

Document Control Procedure

A sample company SOP for creating, reviewing, issuing and maintaining controlled documents.

Document number	DEMO-COMPANY-001	Revision	R0
Department	Quality	Classification	Internal
Prepared by	Asha Demo	Reviewed by	Ravi Demo
Sample issue date	01 October 2026	Approval status	Draft - demo example

1. Purpose

Define a consistent process for controlling company procedures, drawings, reports and certificates so employees can locate the current approved version.

2. Scope

This sample procedure covers company and project documents in the document management system, including their metadata, revisions, review history and retention.

3. Responsibilities

Document owner: prepares the file and checks its content.

Reviewer: checks technical accuracy and requests corrections.

Administrator: completes approval and manages access.

4. Document workflow

1. Create a document with a unique reference, title, department and owner.
2. Upload the file and record its revision and issue date.
3. Submit for manager review, authorized review and final approval.
4. Address comments before issuing the approved document.
5. Check out a document before editing; upload a new revision and check it back in.

5. Renewal and retention

Record expiry dates for time-limited certificates and policies. Set reminders before expiry and assign renewal tasks. Retain superseded copies according to the company retention schedule.

6. Example record

Project: DEMO-PRJ-001 - Demo Warehouse Expansion

Document owner: Asha Demo

Related task: review the site inspection report before issue.

Revision history

R0 - 01 October 2026: Initial fictional example for demonstrating document control.

This example does not represent an approved company policy or a real certification.
